contemporary techniques in mixed motor nerve injuries

hosted by axogen

June 11, 2025

8:00 pm EST

hosted virtually on ZOOM

master the hybrid reconstruction strategy: a comprehensive approach to complex nerve injuries

Join us for a case-driven webinar exploring the **Hybrid Reconstruction Strategy**—a modern, adaptable approach that combines nerve grafting, distal nerve transfers, decompressions, and tendon transfers to address complex peripheral nerve injuries, particularly high-level motor nerve damage.

What participants will learn during this webinar:

- Tackle complexity with confidence
- Maximize functional recovery through nerve grafting and transfers
- Boost early return to function through decompressions and tendon transfers
- Plan for surgical flexibility and back up plans
- Case-based learning through real world scenarios

program faculty

Ian Valerio, MD, MS, MBA, Massachusetts General Hospital

Sunishka Wimalawansa, MD, MBA, Wright State University
