

contemporary techniques in nerve
management:

head & neck reconstructive surgery

Location:

Join us for a one-day interactive program focused on established cranial nerve repair techniques. Learn about considerations for procedural consistency, review treatment-planning concepts, and address complex cases using various approaches. Engage with leading experts as we discuss evolving clinical approaches in a dynamic forum.

program objectives

Stay current with emerging clinical information

Understand the considerations involved in planning for nerve repair

Learn about nerve protection and repair concepts and principles

Practice microsurgical skills in a hands-on cadaver lab

Learn from world-renowned faculty through peer-to-peer case-based discussions

Explore practical tips and learn from the experiences and perspectives of leading nerve experts

invited faculty₁

Sponsored by:

advances and best practices in
nerve management:
**head & neck
reconstructive surgery**

agenda

explore the science and clinical literature

Nerve injuries and quality of life

Evolution of nerve repair

Malignancy and radiation

Diagnostics and assessment methods used in clinical practice

cadaveric simulation of injury and repair

Mandible resection: small segment

Mandible resection: large segment/
bilateral

technical nuances and considerations

Data review and case discussions

Clinical applications for nerve repair technologies (faculty experience discussion)

Nerve repair during mandible resection (faculty experience discussion)

Coding considerations

cadaveric simulation of injury and repair

Cranial nerve protection

Cranial nerve reconstruction
